# PLANS 5.0

CAD Package for Scheme Plan  
Production  
Compliant with MicroStation V8 &  
2004 edition

# PLANS 5.0 CAD Software

**PLANS is the CAD Product enabling quick and easy scheme plan design to high standards and consistency.**

**It is a 'Plug-in' to Bentley MicroStation, developed using the MicroStation Development Language [MDL].**

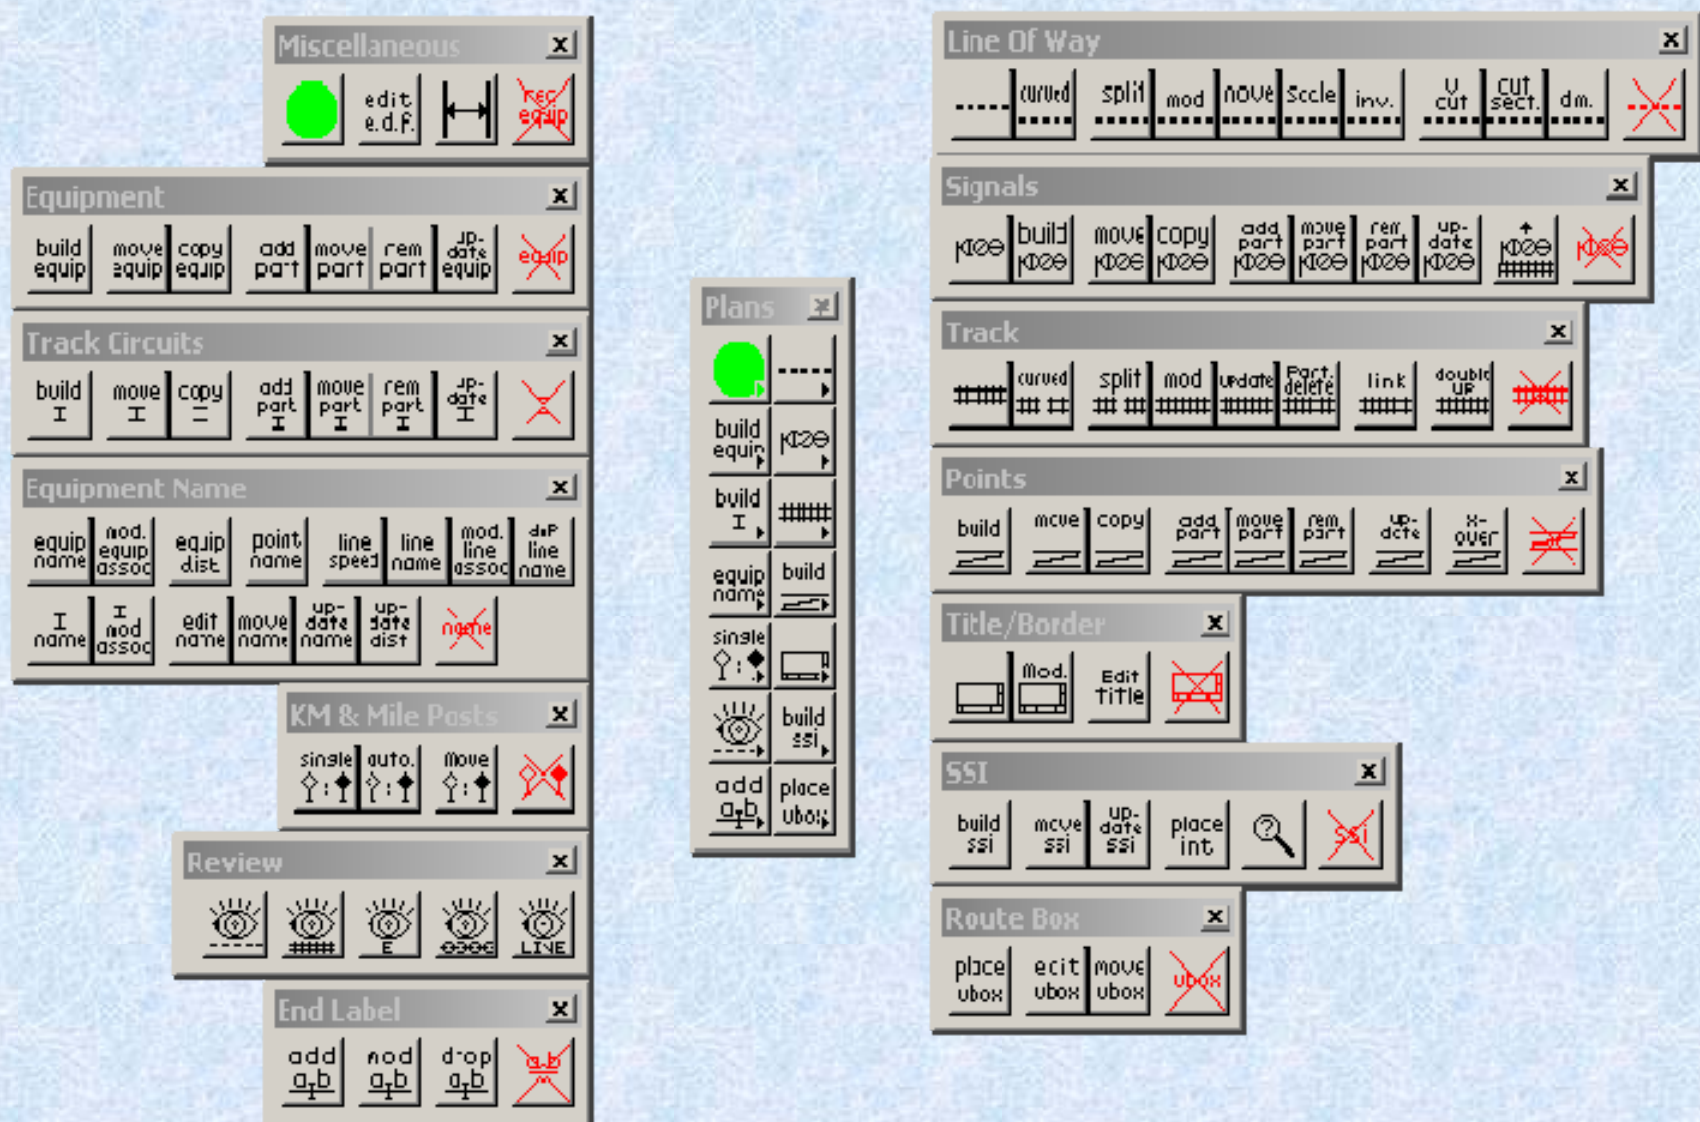

## Features

- **PLANS software retains the look and feel of MicroStation so training is at a minimum**
- **PLANS is fully compliant with Network Rail Company Code of Practice RT/E/C/11004**
- **PLANS can be installed on all Windows Platforms including XP and is compatible with MicroStation versions 'J' (V7) and V8 (including 2004 edition)**
- **Scheme plans can be plotted in A2 & A3 size, with a choice ranging from a single sheet right up to 40 folds**
- **Plans can be scaled and rescaled at 40', 400' 1 to 20 chains, and 1:100 to 1:50,000 in metric or imperial units**
- **The whole plan can be moved to allow better use of space within the border**
- **Allows the use of 'V' cuts, Cut sections and Dimension Cuts**
- **Accurate measurement between equipments e.g. signals and track circuits or points**
- **Fast placement, copying and moving of the most common signals and equipment**

- The user can ‘build’ the more non-standard signals which then can be copied or moved
- Use of the software enforces consistent drawing standards
- User reference documentation is supplied with the Software
- Used extensively within the Railway Signalling Industry

The current PLANS software contains a ‘data set’ based on Network Rail’s requirements (our largest customer).

Signalling Solutions will be happy to discuss requirements for adding other Railway Authority cells and illustrations where required.

- **Currently we supply our PLANS suite to:-**

**Network Rail**

**Atkins**

**Carillion Rail**

**Scott Wilson Railways Ltd**

**WRSL**

**plus many more clients across the Railway Industry.**

### **Support**

- **After the initial purchase the license is bought on an annual basis, which includes maintenance and technical support via telephone and email.**
- **Discount available for bulk licence purchases**
- **Updates to the software and symbols are provided free within the maintenance agreement**
